

Dokumentasi Deploy Aplikasi SIA Laravel di Ubuntu Server

1. Informasi Server

- **IP Address:** 192.168.10.40
- **Folder aplikasi Laravel:** /var/www/html/abn-sia
- **Domain lokal:** sia.abncorp.lan
- **Web Server:** Apache2

2. Konfigurasi Virtual Host

File: /etc/apache2/sites-available/sia.conf

```
apache
<VirtualHost *:80>
    ServerName sia.abncorp.lan
    DocumentRoot /var/www/html/abn-sia/public

    <Directory /var/www/html/abn-sia/public>
        Options -Indexes +FollowSymLinks
        AllowOverride All
        Require all granted
        DirectoryIndex index.php
    </Directory>

    ErrorLog ${APACHE_LOG_DIR}/sia-error.log
    CustomLog ${APACHE_LOG_DIR}/sia-access.log combined
</VirtualHost>
```

3. Aktivasi Site

```
bash
sudo a2ensite sia.conf
sudo systemctl reload apache2
```

4. Konfigurasi Hosts

Tambahkan baris berikut pada file /etc/hosts:

Code

```
192.168.10.40 sia.abncorp.lan
```

5. Permission Laravel

bash

```
sudo chown -R www-data:www-data /var/www/html/abn-sia/storage  
/var/www/html/abn-sia/bootstrap/cache  
sudo chmod -R 775 /var/www/html/abn-sia/storage /var/www/html/abn-  
sia/bootstrap/cache
```

Pastikan file `.htaccess` ada di folder `/var/www/html/abn-sia/public`.

6. Testing

Akses aplikasi melalui browser: <http://sia.abncorp.lan>

7. Catatan Tambahan

- Gunakan `DocumentRoot` langsung ke folder `public` Laravel.
- Untuk keamanan, bisa ditambahkan konfigurasi SSL (self-signed certificate atau Let's Encrypt).
